NOTES TO THE SAMPLER

All samples should be clearly labelled, and should be in double zip-lock bags, or placed in lab-provided containers.

A fully completed chain of custody (COC) form must accompany every sample set.

For very large samples, the sampler is responsible for subsampling before submission.

The lab stores samples and COCs for 3 months only.

Test codes : B - Background, CT - Control, C - Clearance, L- Leak, BL - Blank, R - Reassurance, O - Other (if other, please specify)
